

CIO Blog

Thank you to those of you that have participated in the blog. We encourage everyone to post their comments. Remember, by participating you are helping to shape the direction of OIT – make your opinions heard!

If you have suggestions on topics that you would like to see in the blog, please send a short description of the topic to Ken Pierce for consideration at ken.pierce@utsa.edu.

To log in, please go to: <http://oitblog.utsa.edu/oit/>

Cyber Security Awareness Month 2009

The CSAM Web site will be available very soon. Check the site beginning October 5th for the latest schedule of events:

<http://www.utsa.edu/cybersecurity>

Forefront Anti-virus on ASAP

Currently-enrolled students and UTSA faculty/staff members are eligible to download FREE anti-virus software.

Users must log in to ASAP (<https://asap.utsa.edu>) and choose the “Software Downloads” tab to access the software.

Define Client for Home Use

UTSA faculty and staff members (who have Define accounts) can now access Define via their home PC. However, you will need to install software to set up your Define connection.

To begin, click the link below, then open the “Read Me” file that is applicable to your home PC (select the Windows or Mac version).

SANS Courses: Information Security Training at Reduced Cost

Just a reminder that we have access to SANS Institute courses at much reduced pricing. On Demand SANS allows you to keep up with your information security training via online courses.

View the list of courses: <http://www.utsystem.edu/ciso/sans1.html>

Contact the OIT Information Security Office for more information (security@utsa.edu).

TechWire Blog

OIT recently launched TechWire (formerly our e-newsletter) blog. Please recommend the blog to faculty and staff in your area who are interested in keeping up with the latest OIT news, tips, events and new applications and services.
