

## ITA Meeting Announcements May 2010

---

### Microsoft Forefront deployment

The UTSA McAfee VirusScan site license expires on August 31, 2010. The Desktop Management Team has been tasked with removing McAfee (Anti-virus) VirusScan and installing Microsoft Forefront Client Security (Anti-virus).

#### Windows OS

Every UTSA-inventoried computer that runs a Windows OS will have Microsoft Forefront Client Security (Anti-virus) pushed to their computer during the following date/time:

**Thursday, May 13, 2010  
4:00 AM**

**All Windows PCs on the network will be rebooted.** Microsoft Forefront software will be installed and the McAfee software will be uninstalled with the reboot.

If the time and/or date is not appropriate for your area, please e-mail Alex Ward, Vince Martinez, or Ryan Ancheta with your request, and an appropriate time and date will be allocated.

Apple computers that are running any version of Windows OS (dual-boot) will need to install Microsoft Forefront Client Security (Anti-virus). If present, the McAfee software must be removed. For assistance, contact OIT Support Services at: [oitsupportservices@utsa.edu](mailto:oitsupportservices@utsa.edu)

#### Mac OS X

Please contact OIT Support Services for assistance with the removal of the McAfee software and with the installation of ClamXav, a free anti-virus solution (**Mac OS X only**) (<http://clamxav.com/>). E-mail OIT Support Services: [oitsupportservices@utsa.edu](mailto:oitsupportservices@utsa.edu)

### Adobe CS5 now available

Adobe CS5 is now available to all UTSA departments for UTSA-inventoried computers. Purchases that go through SHI, a HUB vendor, are generally less expensive. Purchases can also be made through the Campus Technology Store, but their prices have been more expensive than SHI pricing in the past.

Additionally, purchases of Adobe Acrobat 9 Pro should include maintenance as the maintenance will allow for a free upgrade when Acrobat 10 Pro is released in the Fall of 2010.

If you have questions about Adobe CS5, contact Matthew Marr at: [matthew.marr@utsa.edu](mailto:matthew.marr@utsa.edu)
