

ITA Meeting Announcements June 2010

Casting Call

The Office of Information Technology is recruiting a willful and energetic cast for our upcoming Summer Splash project videos.

Next week (week of June 7) we are shooting the video for the Apple Computer Support project and would like to have a staff member who is a regular Mac user to participate in just a couple of lines for the video.

The week of June 14, we will be shooting the myApps video and the week of June 21, we are planning on producing the Email Infrastructure (Upgrade) video.

Please e-mail us at oit@utsa.edu or call Carolyn Ellis (x6616) if you are interested.

Adobe CS5 now available (Reminder)

Adobe CS5 is now available to all UTSA departments for UTSA-inventoried computers. Purchases that go through SHI, a HUB vendor, are generally less expensive. Purchases can also be made through the Campus Technology Store, but their prices have been more expensive than SHI pricing in the past.

Additionally, purchases of Adobe Acrobat 9 Pro should include maintenance as the maintenance will allow for a free upgrade when Acrobat 10 Pro is released in the Fall of 2010.

If you have questions about Adobe CS5, contact Matthew Marr at: matthew.marr@utsa.edu
